

## HOW TO USE THIS DIRECTORY

- *Open the file of your choice and use the “**Search**” facility to locate the aircraft entry you require, or scroll down the pages to view all entries*
- *Use the “**Zoom In**” function to enlarge the text to your individual required size*

The listings cover all the known history of each aircraft following its disposal by the military. From left to right the following details are given:

**Column 1:** c/n : constructor's number / manufacturer's serial number

**Column 2:** Aircraft type and subsequent changes to designation or model

**Column 3:** military serial number

**Column 4:** civil registrations. The use of 1) or 2) after a registration indicates its second or third use of that registration on that type of aircraft only

**Column 5:** history and owners information

**Column 6:** dates: presented in Day/Month/Year (DD.MM.YY) format. To present useful information in a minimum of space the following convention is used:

87/94	that ownership or status from (at least) 1987 until 1994 (at least)
.87/94	that ownership or status occurred during 1987 and continued until (at least) 1994
5.87/94	that ownership or status occurred in May 1987 and continued until (at least) 1994
22.5.87/94	that ownership or status occurred on 22 May 1987 and continued until (at least) 1994

Ownership dates are usually based on official civil aircraft registers. When a change of ownership date quoted is earlier than that shown in official registers, it is based on information from owner or other sources.

**Dot system:** a dot in Column 1 indicates that the airframe is believed to be extant.

**Compiler's notes:** when further explanation is required, a note will be added at bottom of each aircraft history in italics.

**Aircraft colour schemes:** aircraft markings are presented as "463675/E6-D Sierra Sue II": ie. military serial (as painted on aircraft) / aircraft code letters / aircraft name. The use of quotation marks does not imply that the serial is inaccurate for that particular aircraft.

***Date Presentation reminder: Day/Month/Year (DD.MM.YY) format.***
